

Atlantis Wins Outstanding Business Achievement Award

14 November 2006

Delegates from Atlantis Systems and our Board of Directors attended a banquet hosted by the Ontario Chamber of Commerce. This banquet was to celebrate the achievements of some of the most successful organizations in Ontario and to acknowledge their substantial contributions to Ontario's economy. The organizations recognized by the OCC demonstrate excellence in such things as innovation, job creation, and corporate governance; "They have set the standard for excellence in their own communities."

We are pleased to announce that Atlantis Systems International won the Outstanding Business Achievement Award in the Small Business Category. This award was accepted by our President and CEO, Andrew Day, in the presence of the Premier of Ontario, the Honourable Dalton McGuinty, several other Government Ministers and our customer Boeing, represented by Dan Pagel, and the RAAF, represented by Steven Murphy.

Andrew accepted on behalf of the Company and delivered some very heartfelt and meaningful remarks to the audience. During the evening, Dan Pagel and Steven Murphy also presented an award to Andrew in appreciation of the Phase 2.2 Hornet upgrade.
